Comcast 3Q26 IR Callback

October 22, 2026

Most Important Guidance & Clarifications

CONNECTIVITY & PLATFORMS (4Q26)

- **GUIDANCE:** C&P EBITDA decline to improve by less than the 140bps of 3Q; the Street is landing at about –3.5% YoY.
- **GUIDANCE:** Broadband ARPU decline to improve by less than the 90bps of 3Q; the Street is landing at about –2.2% to –2.3% YoY.
- **GUIDANCE:** The Street is at 220K–230K broadband sub losses for 4Q.
- **GUIDANCE:** Street wireless net adds were 380K coming into the call and do not appear to be moving.

TRANSFORMATION CHARGE

- **CLARIFICATION:** The charge is estimated at >$1B, mostly C&P, includes severance, and may be adjusted out (undecided). All 4Q comments above exclude it.

THEME PARKS / PEACOCK

- **GUIDANCE:** Orlando drives 4Q Parks headwinds; the Street is at about –14% to –15% for 4Q [metric unclear in recording].
- **GUIDANCE:** Peacock is not expected to be negative for FY26, even if 4Q is weaker [partly unclear in recording].

2027

- **CLARIFICATION:** No 2027 outlook. The plan is being formulated under the incoming CEO, and transformation savings may be reinvested.

1. Connectivity & Platforms — 4Q outlook

How should we read "further slight improvement" in 4Q, and where is the Street landing?

- **CLARIFICATION:** 3Q delivered the expected modest YoY improvement in convergence ARPA, broadband ARPU and C&P EBITDA.
- **GUIDANCE:** Broadband ARPU improved 90bps in 3Q. "Further slight improvement" means it improves again, but by less than 90bps. The Street is landing at about –2.2% to –2.3%.
- **GUIDANCE:** The C&P EBITDA decline improved 140bps in 3Q. The 4Q improvement will be less than 140bps. The Street is at about –3.5%, roughly 90bps of improvement.
- **GUIDANCE:** Broadband sub losses: the Street is at –220K to –230K for 4Q (low end 228K). About 8 analysts were updating today [figure unclear in recording].
- **GUIDANCE:** Wireless net adds: the Street was at 380K coming into the call, and that does not appear to be moving.

2. Transformation charge

Where will the >$1B transformation charge land in the financials?

- **CLARIFICATION:** The >$1B figure is an estimate. Most of it is C&P, with some in C&E [unclear in recording] and Corporate. The exact split is unknown.
- **CLARIFICATION:** It includes severance. No layoffs have happened yet, and there is no exact 4Q figure for severance and other costs.
- **CLARIFICATION:** Comcast may adjust the charge out of results, which it has not done before; the treatment is undecided. Even if it is included in C&P, underlying numbers will be shown. Model the underlying business.
- **CLARIFICATION:** All 4Q comments (ARPU, C&P EBITDA, subs) exclude severance and the charge.

3. Broadband ARPU — puts and takes into 2027

How should broadband ARPU evolve sequentially into 2027?

- There has been no 2027 commentary. For 2026, all new customers go on new all-inclusive pricing and packaging (no equipment charges), and the legacy base is being migrated.
- **GUIDANCE:** The majority of the legacy base migration should be done by year-end 2026.
- **CLARIFICATION:** Legacy migration and free wireless lines pressure broadband ARPU, while free lines converting to paid help. The effect compounds: several quarters of free lines are in the base against only one quarter of paid conversions, so an inflection takes several quarters. With everything held constant, these dynamics can be extended into 2027.

4. 2027 framework

Directionally, how should we model 2027, especially broadband?

- **GUIDANCE:** There is no 2027 outlook yet. The plan is being formulated with the incoming CEO, who is reviewing every line item, as Comcast becomes a pure-play cable company after the separation.
- **CLARIFICATION:** Strategies may change, and a meaningful portion of transformation cost savings may be reinvested in new initiatives. The 2027 story and goals will come later.
- No direct answer on 2027 broadband vs. 2026 [unclear in recording].

5. Theme Parks

What is the 4Q setup for Parks, and does the 2H27 return to growth refer to revenue or EBITDA?

- **CLARIFICATION:** Orlando pressure is the driver of headwinds across total Parks.
- **GUIDANCE:** The Street is at about −14% to −15% for 4Q [revenue vs. EBITDA unclear in recording].
- **GUIDANCE:** Pressure is expected to continue into 1H27, with growth in 2H27. Whether "growth" refers to revenue or EBITDA is unclear in the recording.

6. Peacock

Given content-cost timing, should we expect negative Peacock EBITDA in 4Q? Could it be positive in 1Q27?

- **GUIDANCE:** Peacock is not expected to be negative for the full year 2026; 4Q may be negative [unclear in recording].
- **CLARIFICATION:** No comment on 1Q27.
